For Hawai’i and its residents to be competitive globally, we must increase the
education of our residents. Meeting the goals for economic competitiveness
requires improvement of educational outcomes at all levels:

- More children in quality early education programs and entering kindergarten
  ready to learn;
- More children reading at grade level by third grade;
- More youth graduating high school ready for success in careers and college;
- More high school graduates entering college and earning their degrees in a
timely manner; and
- More college graduates meeting the state’s workforce needs.

This report presents information on how well Hawai’i’s graduates are prepared
for career and college success and to achieve the State of Hawai’i Department
of Education’s Vision of a High School Graduate. The indicators are selected
from data currently available and based on recommendations from the report,
Measures that Matter: Making College and Career Readiness the Mission of

The College and Career Indicators Report is an annual collaboration between
the State of Hawai’i Department of Education (DOE) and the University of
Hawai’i, coordinated by Hawai’i P-20 Partnerships for Education. Hawai’i P-20
issues this report each spring for the previous year’s graduating class. This
year’s report includes DOE graduate placement into college-level math and
English courses and information provided by high schools about their graduating
class. Additional report measures are expected to be added in the future as data
becomes available.

We appreciate your suggestions and comments about the data reported, explanations of the data
and other indicators to include in this report. Please contact Jean Osumi at josumi@hawaii.edu
Hawai’i P-20 Partnerships for Education.
## College and Career Readiness Indicators Class of 2009

### Education Laboratory

**June 2009 Graduates**

### School Reported College and Career Indicators

No additional college/career readiness information provided by the school.

‡ These data represent graduates’ confirmed college enrollment following high school graduation and are based on reports provided by the National Student Clearinghouse. Hawai'i P-20 recommends that schools may estimate their actual college going rates to be approximately six percentage points higher than confirmed Clearinghouse enrollments. For further explanation, see technical report at http://www.p20hawaii.org/indicators_report.html.
