The Hawai'i P-20 Council set a goal of 55% of Hawai'i’s working age adults having a two- or four-year degree by 2025. It aligns with the University of Hawai'i’s goal to increase the completion of degrees and certificates by 3–6 % per year, and the Hawai'i Department of Education’s Strategic Goal that all students graduate college- and career-ready. President Barack Obama has set a national goal that 60% of working age adults attain a two- or four-year college degree by 2025.

For Hawai'i and its residents to be competitive globally, we must increase the educational attainment of our residents. By year 2018, 65% of all jobs available in the state will require at least some postsecondary training or education1. To prepare for a successful state economy, we need:

• More children in quality early education programs and entering kindergarten ready to learn;  
• More children reading at grade level by third grade;  
• More youth graduating high school ready for success in careers and college;  
• More high school graduates entering college directly from high school and earning their degrees in a timely manner; and  
• More college graduates meeting the state’s workforce needs.

This report presents information on how well Hawai'i’s graduates are prepared for career and college success and to achieve the State of Hawai'i Department of Education’s Vision of a High School Graduate2. The indicators are selected from data currently available and based on recommendations from the report, Measures that Matter: Making College and Career Readiness the Mission of High Schools (http://www.achieve.org/node/79).

The College and Career Readiness Indicators report is an annual collaboration between the State of Hawai'i Department of Education (DOE) and the University of Hawai'i, coordinated by Hawai'i P-20 Partnerships for Education. Hawai'i P-20 issues this report each spring for the previous year’s graduating class. It includes DOE graduate placement into college-level math and English courses and information provided by high schools about their graduating class. Additional report measures are expected to be added as data become available.
