The Hawai'i P-20 Council has set a goal of "55 by '25" where 55% of Hawai'i's working age adults will have a two- or four-year degree by 2025. This goal aligns with the University of Hawai'i's Hawai'i Graduation Initiative, which aims to increase the completion of degrees and certificates by 3 to 6 percent per year through 2015, and with the Hawai'i State Department of Education's goal that all students graduate college- and career-ready. President Barack Obama has set a national target - the United States will lead the world with the highest share of college graduates by 2020.

Preparing for Statewide Success

For Hawai'i and its residents to be competitive globally, we must increase the educational attainment of our residents. By the year 2018, 65% of all jobs available in the state will require at least some postsecondary training or education1. To prepare for a successful state economy, we need:

- More children in quality early education programs and entering kindergarten ready to learn;
- More children reading at grade level by third grade;
- More youth graduating high school ready for success in careers and college;
- More high school graduates entering college directly from high school and earning their degrees in a timely manner;
- More college graduates meeting the state's workforce needs.

College, Career, and Community Readiness in Hawai'i

A statewide definition of College, Career and Community Readiness in Hawai'i, adopted by the Hawai'i P-20 Council, states: Students who are prepared for meaningful engagement in college, career, and community have successfully:

- Achieved proficiency in essential content knowledge;
- Mastered key learning skills and cognitive strategies;
- Acquired practical knowledge enabling successful transitions from high school to college and career;
- Built a strong foundation of identity through an ongoing process of wayfinding to engage in local, national and global contexts.

The College and Career Readiness Indicators report is an annual collaboration between the Hawai'i State Department of Education and the University of Hawai'i System, and is coordinated by Hawai'i P-20 Partnerships for Education. Hawai'i P-20 publishes this report each spring for the previous year's graduating class. Additional report measures are expected to be added as data become available.

### High School Outcomes

* data not available/reported  † data not reported due to small cell size

---

1. For this report, high school completers include those who have earned diplomas or certificates of completion.
2. On-time graduation rate is based on the first-time ninth grade cohort adjusted for students who transferred in or out. Class of 2011 and 2012 on-time graduation rates are finalized. Class of 2013 on-time graduation rate is reported as preliminary and will be finalized for the 2015 publication of the CCRI.
3. Hawai‘i State Assessment (HSA) proficiencies are based on each graduating class’s 10th grade scores: scores for the Class of 2013 are from the Spring 2011 HSA administration; Class of 2012, from Spring 2010; and Class of 2011, from Spring 2009.
4. Advanced Placement results are reported for high school completers who took at least one Advanced Placement exam during high school.
5. Dual Credit participants are high school completers who took at least one credit course from the University of Hawai‘i while they were still enrolled in high school.
6. High school completers’ confirmed college enrollment following high school graduation, based on reports provided by the National Student Clearinghouse.
7. Data on high school diploma earners enrolled in college within 16 months after high school graduation provided by the National Student Clearinghouse.
8. College credit earned from UH via dual credit, Advanced Placement or International Baccalaureate exams, or in the first summer after high school.
9. “Other” courses satisfy UH general education requirements and/or may be used to fulfill a “terminal” mathematics or English requirement for a degree or certificate.
